06 – 122 4040 2

Experienced project- and change-oriented leader with more than 15 years of experience in industrial and manufacturing environments. I bring structure to complex change and connect people, processes and disciplines to turn ambitions into concrete results.

My substantive background lies in procurement, supply chain and operations. I combine a pragmatic, results-driven approach with a strongly people-oriented style of leadership. I believe in trust, ownership and collaboration as the foundation for sustainable change.

I am keen to put my experience and change capability to work for organizations looking to build future-proof and sustainable results.

Core Competencies

Project & Transformation	Procurement & Supply Chain	Leadership
Project and change management	Strategic procurement	People-oriented leadership
Organizational development	Supply chain optimization	Team development
Process optimization	TCO & Cost reduction	Ownership
Stakeholder management	Supplier development	Connecting people and disciplines
ERP and system implementations	Contract management	

Work Experience

Interim Manager & Consultant

Van Der Staaij Interim Solutions, Hillegom | Oct 2026 - present

I am at my best where strategy meets execution. I bring structure, connect people and perspectives, and translate complex challenges into clear plans and visible progress. I am particularly interested in technology-driven organisations working on tomorrow’s challenges, from the energy transition and

mobility to circularity and sustainable industry. My guiding question is simple: “What does it take to make this happen?”

I am open to senior leadership, interim and transformation roles where I can turn strategy into action, connect people and disciplines, and deliver results. With almost 20 years of experience in procurement, supply chain, project management and transformation, I have built and professionalised functions, developed teams and led complex change in international industrial environments.

Procurement Manager
Hitachi Construction Machinery Europe NV (HCME), Amsterdam | Apr 2023 - Sep 2026

- Leading the transformation of the procurement organization, including the integration of operational purchasing from Supply Chain.
- Redesigning the organization with clearly defined operational, tactical and strategic roles and responsibilities.
- Developing Procurement into a more strategic, externally focused business partner.
- Leading the ERP transition from SAP ECC to SAP S/4 for the Procure-to-Pay processes.
- Delivering €6M in structural cost savings through supplier optimization and value creation.
- Leading a team of 14 professionals across strategic, tactical and operational procurement.
- Responsible for an annual purchasing volume of €100M+ within a complex international supply chain.

Corporate Program Manager
Hitachi Construction Machinery Europe NV (HCME), Amsterdam | Aug 2018 - Apr 2023

- Coordinating a large-scale organizational transformation impacting 400+ employees and generating €20M+ in annual savings.
- Leading an integrated factory transformation, redesigning production, logistics, warehousing, infrastructure and safety.
- Acting as the link between project streams and the Management Board, including progress reporting and decision-making support.
- Recognized, together with the project team, with a President's Award from the Japanese parent company for the successful factory transformation.
- Monitoring the progress and coherence of projects within two organization-wide programs.
- Connecting project teams and disciplines and creating clarity on dependencies, risks and collaboration.
- Challenging project leaders with critical, independent questions to sharpen goals, KPIs and progress.

Supply Chain Manager
Blok Mechanische Industrie (BMI), Velsen-Noord | Dec 2017 - Jul 2018

- Responsible for the daily coordination between production, purchasing, material availability and logistics.
- Leading a team within production preparation, purchasing and warehousing.
- Started to stabilize material flows and improve the purchasing structure.

Supply Chain Management Manager
Hitachi Construction Machinery Europe NV (HCME), Amsterdam | Mar 2015 - Nov 2017

- Leading Warehouse, Operational Procurement and Production Planning, with a total of around 70 employees.
- Leading the complete redesign of the warehouse, completed within three weeks during the summer shutdown.
- Initiating safety improvements, including better separation of pedestrian and forklift traffic.
- Improving warehouse processes and material flows in close collaboration with shop-floor employees.
- Introducing an inventory management tool to reduce material shortages, expedite costs and production disruptions.
